

## E-Core™ Pallet

Sustainable Engineered Composite Pallet

Rehrig Pacific, with 90+ years of experience developing new and innovative products for industry, introduces the revolutionary E-Core Pallet, a 100% recycled/recyclable reusable packaging solution. E-Core is constructed using Rehrig's new RECB™ composite fiberboard in combination with ECOR®'s advanced environmental composite material. Both of these materials are manufactured utilizing 100% recycled wood and/or paper fibers.

The E-Core Pallet offers the strength and reliability of a traditional whitewood pallet with the versatility and ease of use of a plastic pallet. It's solid-deck, 9-block, 4-way design can be customized to meet any application. The construction is completely nailless, providing safe, damage-free use for your most delicate packaging. To close the recycling loop, RPL can create your E-Core assets using your recyclable waste materials for even further savings.

### Application Flexibility

- Flexible configuration in footprint and height
- Compatible with AS/RS systems
- Bottom deck can be solid or cruciform for pallet jack use
- No loose fasteners or splinters for excellent product protection
- Designed to international shipping standards

### Durable & Sustainable

- Dimensionally stable solid- deck, 9-block design
- Made using strong, lightweight engineered wood products
- Contains 100 % recycled/recyclable materials
- Reusable for lower initial cost
- Manufactured using non-toxic adhesives

As a total solution provider, we offer asset management and reverse logistics solutions that can deliver significant additional savings. RPL can provide a customized pooling program to manage and track your investments, including pallets and other dunnage. RPL can also clean, repair, return or recycle every asset insuring maximum value. Our nationwide team of experts is ready to meet with you and plan an optimized and sustainable solution that will improve efficiency and reduce costs.
