

Pairing Pallets & Recycling

Unlike most pallet or recycling companies, RPL can pair wood pallet services and recycling services together to help you maximize recycled material value and decrease pallet costs.

Here's how it works:

- RPL delivers a load of wood pallets.
- When the trailer is empty, that same trailer can be loaded with your recycled materials and used pallets.
- RPL will take the materials back to our local facility and weigh them.
- RPL can either pay you directly, or credit you towards your next pallet purchase.

The Rehrig Advantage:

- Increase recycled material value and decrease pallet pricing by back-hauling materials
- Free up dock spaces by live-loading recycling materials
- Increase the frequency of material pickups by taking partial trailer loads
- Pay you directly, or credit you towards the purchase of pallets
- Can accept cardboard, plastic containers, stretch film, wood scrap, office paper, metals, glass and mixed plastics
- Can accept mixed loads of recyclables and pallets
- Uses the PARTS Tracking system to log all of your pallet loads and recycled materials
