

RPL has developed a complete recycling program that helps reduce landfill waste and enhances your corporate sustainability objectives. We work with your company by performing a comprehensive audit of the complete supply chain to determine what type of materials can be recycled. RPL can handle not only your standard recycling materials but also your most difficult ones.

Materials RPL can help with:

- Cardboard containers (OCC)
- Plastic pallets and containers
- Stretch film
- Wood pallets
- Scrap wood
- Office paper
- Metal
- Glass
- Mixed plastics (#1-7)

The RPL Advantage:

- Accepts mixed loads of materials including pallets
- Reduces the cost of freight by rolling together services and back-hauling recycled materials
- Uses the material in-house or sells directly to end users
- **Innovative solutions to maximize material values**
